Zircon Computing Announces Its Latest Webinar: "Developing Mission-critical Applications Using Zircon's Pattern-Oriented Distributed Computing Middleware"

Wayne, New Jersey – November 30, 2009 -- Zircon Computing, developers of Zircomp®, the world's fastest adaptive distributed computing software, is pleased to announce an upcoming webinar describing how to develop and deploy mission-critical applications using Zircon's pattern-oriented distributed computing middleware. The webinar will be held on Thursday, December 10, 2009 from 11:00 AM - 12:00 PM EST.

Join Zircon CTO Dr. Douglas C. Schmidt for a detailed session covering the integration of Zircon software in large-scale, mission-critical applications. Learn how Zircon's zNet® real-time pattern-oriented middleware based on ACE™ facilitates load balancing, network failover, inter-thread/inter-process messaging communication and native data passing over heterogeneous networks. Technical details and functionality comparisons will be discussed along with real-world examples and case studies from the financial services domain.

Registration for this event is located [here](#).

About Doug Schmidt

Dr. Douglas C. Schmidt leads technology strategy and solutions, community development, and external strategic partnerships at Zircon Computing. He has published nine books and over 400 technical papers covering a range of research topics, including patterns, optimization techniques and analyses of software frameworks and modeling environments that facilitate the development of distributed real-time and embedded (DRE) middleware and applications. Dr. Schmidt also served as a Deputy Office Director and Program Manager at DARPA, where he led the national R&D effort on middleware for DRE systems.

About Zircon Computing

Zircon Computing, LLC is an international software and services company, based in Wayne, New Jersey. Founded in 2005 by senior technologists from the financial services industry, Zircon develops and markets the Zircomp® Software Suite of adaptive distributed computing software and services. Zircon customers include major financial services firms, government agencies, universities, and advanced technology companies. Zircon markets the Zircomp® Software Suite worldwide both directly to enterprise clients and through an international network of partners. Zircon is privately held.
