Zircon Computing Announces Participation at the Gartner® 28th Annual Data Center Conference

Annual Data Center Conference is in Las Vegas, Nevada from December 1 through December 4, 2009

Wayne, New Jersey – November 11, 2009 -- Zircon Computing, developers of the world's fastest adaptive distributed computing software – Zircomp ® - announced today participation at the Gartner 28th Annual Data Center Conference in Las Vegas, Nevada, from December 1 through December 4, 2009.

"Zircon is extremely pleased to participate in what has become one of the most widely attended and highly regarded Gartner events of the year", said Alexander Mintz, CEO of Zircon Computing.

He adds: "optimizing IT costs, improving quality of IT services and maximizing productivity from existing applications are key areas of focus at this event, and Zircon is at the center of this activity."

About Zircon Computing

Zircon Computing, LLC, is an international software and services company, based in Wayne, New Jersey. Founded in 2005 by senior technologists from the financial services industry, Zircon develops and markets the Zircomp ® Software Suite of adaptive distributed computing software and services. Zircon customers include major financial services firms, government agencies, universities, and advanced technology companies. Zircon markets the Zircomp ® Software Suite worldwide both directly to enterprise clients and through an international network of partners.
