**Zircon Computing announces the first in a series of webinars:  
"Distributed Computing on Existing Infrastructure for Phenomenal  
Application Performance, Fault Tolerance and Scalability."**

**Wayne, New Jersey – November 2, 2009** -- Zircon Computing, developers of the world's fastest adaptive distributed computing software – Zircomp - announced today the first in a series of webinars. The series will focus on how companies of all sizes are increasing application performance, fault tolerance, and achieving extreme scalability with the Zircomp software platform.

Zircon Computing will provide a technical overview and description of how their flagship product Zircomp is deployed as a distributed computing framework. Zircomp software facilitates load balancing, network failover, inter-thread messaging communication and native data passing over heterogeneous networks.

With as few as six APIs, engineers can easily obtain significant performance gains with extreme scalability, without compromising reliability or security.

Leading experts from Zircon will provide an overview of the Zircomp software along with representative examples from mission-critical production systems in use today.

**About Zircon Computing**

Zircon Computing, LLC, is an international software and services company, based in Wayne, New Jersey. Founded in 2005 by senior technologists from the financial services industry, Zircon develops and markets the Zircomp ® Software Suite of adaptive distributed computing software and services. Zircon customers include major financial services firms, government agencies, universities, and advanced technology companies. Zircon markets the Zircomp ® Software Suite worldwide both directly to enterprise clients and through an international network of partners. Zircon is privately held, and for more information, please visit <http://www.zircomp.com>

Zircomp is a registered trademark of Zircon Computing, LLC
