**Zircon Computing announces Jumpstart Service program**

***Program delivers product training and consulting services to meet customer requirements***

**Wayne, New Jersey – March 16, 2009** -- Zircon Computing, developers of the world's first adaptive distributed computing software - Zircomp™ - announced today the development of the Zircomp Jumpstart Service program.

"Our customers want a quick, thorough, and easy way to implement and benefit from the Zircomp software suite" explains Alexander Mintz, CEO, Zircon Computing LLC. "We developed the Jumpstart Services program to help our customers complete the installation process, deliver customized training, provide ad-hoc onsite assistance, and give specific integration examples and guidance." He adds "and our customers wanted this to be delivered all in one shot and in less than a week, by knowledgeable and senior technologists."

The Zircomp Jumpstart Service program is part of a comprehensive set of service offerings from Zircon Computing which includes pilot program, discovery, project implementation, and support services.

**About Zircon Computing**

Zircon Computing, LLC, is an international software and services company, based in New Jersey that provides the Zircomp Software Suite of adaptive distributed software and services. Zircon is privately held, and was founded in 2005 by senior technologists from the financial services industry. Zircon customers include major financial services firms, government agencies, universities, and advanced technology companies. Zircon markets the Zircomp Software Suite worldwide both directly to enterprise clients and through an international network of partners. For more information, please visit <http://www.zircomp.com>
