Zircon Computing announces Partnership with NewServers

Team Up to Develop the First On-Demand, High Performance, Distributed Cloud Computing Service

Wayne, New Jersey – April 21, 2009 -- Zircon Computing, developers of the world's fastest adaptive distributed computing software - Zircomp™ - announced today a partnership with NewServers, of Fort Lauderdale, Florida. Zircon and NewServers have teamed up to provide the world's first On Demand High Performance, Distributed Cloud Computing Program.

"Our customers want a quick, thorough, and easy way to implement and benefit from the Zircomp software suite" explains Alexander Mintz, CEO, Zircon Computing LLC. "We developed the partnership with NewServers to help our customers with immediate processing requirements". He adds, "by teaming up with NewServers, we help our clients gain instant access to a secure public or private cloud, that can scale on demand for their most important and sensitive processing needs".

NewServers CEO JP Gagne, says: "The partnership with Zircon Computing allows customers the ability to deploy Zircon's enterprise level application and scale computation capacity on-demand. Zircon users will have a virtual super computer right out of the box."

About Zircon Computing

Zircon Computing, LLC, is an international software and services company, based in New Jersey that provides the Zircomp Software Suite of adaptive distributed software and services. Zircon is privately held, and was founded in 2005 by senior technologists from the financial services industry. Zircon customers include major financial services firms, government agencies, universities, and advanced technology companies. Zircon markets the Zircomp Software Suite worldwide both directly to enterprise clients and through an international network of partners. For more information, please visit <http://www.zircomp.com>

About NewServers

NewServers Incorporated, of Ft. Lauderdale, FL has the first and only dedicated server cloud service. The NewServers "Bare Metal Cloud" is a true Hardware as a Service (HAAS) offering that provides all of the benefits of cloud servers without the latency, unpredictability, and insecurity of VPS instances on shared servers. With Instant Automated Provisioning, Hourly Billing, and an XML over HTTPS API NewServers delivers all the benefits of cloud computing without changing enterprise server architecture. With pure Internap bandwidth and our Tier-IV Data Center (Nap of the Americas) we eliminate the capital expenditure of deploying servers while still providing PCI, Sox, HIPPA and SAS 70 Type II compliance.
